Objective

Motivated and fast-learning Computer Science student specializing in Software Industry and Multimedia. Seeking internship opportunities to apply and expand my programming knowledge and front-end development skills. Passionate about building clean, interactive user interfaces and solving real-world problems through code.

Technical Skills

- Programming Languages: Java, Python, HTML, CSS, JavaScript
- Concepts: Object-Oriented Programming (OOP), Programming Fundamentals, Database Design, Artificial Intelligence
- Tools & Technologies: Git, GitHub, Visual Studio Code, Browser Developer Tools

Project Experience

- Personal Portfolio Website: Built with HTML, CSS, and JavaScript to showcase skills and projects.
- Simple Calculator App: Java GUI application (Swing) for basic arithmetic operations.
- To-Do List Web App: Interactive front-end project with task creation/editing using JavaScript.
- Student Grades Manager: Python-based tool to input, store, and analyze student grades.

Courses & Certifications

- Python Programming (Certificate)
- Database Fundamentals (Certificate)
- Introduction to Artificial Intelligence (Certificate)
- Front-End Web Development (Certificate)
